

AUGUST 2025 CROSSWORD

Across

- 6.** The opening section of a paper or lab report
- 8.** What you call the person who taught you something
- 11.** A student's book carrier, and often a researcher's go-to bag for fieldwork
- 12.** What a teacher gives you to do, and a lab's designated task
- 14.** The main subject of a biology class, and a cell's central part
- 16.** A student's major project and a lab's study
- 17.** The teacher's plan for the day, and the steps written before a complex experiment
- 19.** A lab tool that can be found in a science classroom
- 23.** A lab worker's "prep day" involves setting these up for a long experiment
- 25.** The process of making something new in a lab or a classroom

Down

- 1.** What you do with your thoughts before writing a research paper
- 2.** The outcomes of a lab's work, and what a student gets from an assignment
- 3.** The goal of a student's study prep, and what we do to a sample
- 4.** Where students conduct experiments, and where scientists work
- 5.** What a student writes on a paper, and what a lab writes to summarize an experiment
- 7.** A container for liquids in the lab and in science class
- 9.** Outcome both students and experiments aim for
- 10.** What you need to do to understand an experiment
- 13.** The person who teaches a class, and someone who guides lab work

27. The person in charge of a lab and a class project

28. The first part of a student's report, and the first part of a lab report

29. What a student gets on a test, or a classification of quality

32. Extending the use of a resource, or the process of making things new

33. The teacher's outline for the week, and a lab's organized workflow

34. What a teacher tries to get from a student, and the careful focus needed in the lab

35. A favorite break for both students and lab staff

15. A device that separates mixtures in a lab, often seen in school science labs

18. The name of the person who teaches you science

20. The subject of a student's report, and a scientist's specialty

21. The final step in a student's research, and in a lab's report

22. What a student needs for their lab report, and what an analyst provides

23. What students do to their papers before turning them in, and a step in a lab procedure

24. A type of notebook often used in labs and by students

26. A student's group, and how a lab operates

30. What a teacher does to clarify a topic, and what a lab does with its findings

31. What a student does to prepare for a quiz, and what a lab technician does to a sample
